

EEMB Seminar Series: Fall Quarter 2011

Seminars are on Mondays from 4-5pm in the MSRB Auditorium

Sept 26

Nitin Phadnis, Fred Hutchinson Cancer Research Center

Genetic conflict and speciation

Host: Tom Turner

Oct 3

Elena Kramer, Harvard University

Genome level views of novel floral organ identity

Host: Scott Hodges

Oct 10

Fred Adler, University of Utah

The virtues of waiting, procrastinating and avoiding conflict

Host: Steve Proulx

Oct 17

Miguel Altieri, UC Berkeley

Agroecology and the design of biodiverse and resilient farming systems

Host: Ashley Larsen

Oct 24

Paul Valentich-Scott, Santa Barbara Museum of Natural History

Understanding global biodiversity of marine bivalve mollusks

Host: Armand Kuris

Oct 31

Wayne Getz, UC Berkeley

Being eaten alive or dead: a biomass transformation web approach to modeling food webs

Host: Erin Mordecai

Nov 7

Joel Abraham, CSU Fullerton

Exploring student understanding and engagement in biology

Host: Alice Nguyen

Nov 14

Dan Speiser, UC Santa Barbara

The evolution of 'shell eyes' in polyplacophoran molluscs

Host: Todd Oakley

Nov 21

Markos Alexandrou, UC Santa Barbara

Copycats: the evolutionary ecology of neotropical mimetic catfish

Host: Todd Oakley

Nov 28

James Brown, University of New Mexico

Toward a metabolic theory of ecology

Host: Armand Kuris
