

2011/2012

To: Independent Studies Students

From: Craig Carlson, Director of Undergraduate Studies  
Alina Haas, Undergraduate Academic Advisor  
Department of Ecology, Evolution and Marine Biology

Re: Departmental Senior Honors Program

The Departmental Seniors Honors Program is designed to provide students with the opportunity to demonstrate excellence in their major field through an original independent research project. Students applying for acceptance into this program will be expected to devote much of their senior year to the design and completion of the project.

To be considered for the Senior Honors Program, students must have a major upper-division gpa of 3.0 (independent studies grades are not used within this calculation), the support of a faculty member, must be eligible to enroll in independent studies' courses (see the UCSB general catalog), and must be able to complete a minimum of 9 graded units of EEMB 199 on the project. Qualified students should submit their proposals to the department during the fall quarter of their final senior year. After departmental review, a list of eligible participants will be forwarded to the College of Letters and Science Honors Office and the Registrar's Office. NOTE: Students and faculty will be notified only if there are questions regarding an applicant's proposal or if a student's participation in the program has been denied. So in this case, no news is good news. Once a student's application has been approved, he or she will be given a special library card with privileges equivalent to those given to graduate students.

During the spring quarter of the student's graduating senior year, faculty sponsors will be contacted and asked to evaluate each student's progress and to recommend those students whose work deserves the recognition of distinction in the major. Students completing the program successfully will have the award listed in the commencement brochure and will have it noted on their official transcripts and diploma.

The following constitutes the Senior Honors Application:

1. Cover page (attached).
2. Description of the project (limited to two typewritten pages).
3. Faculty recommendation (attached).
